

YOUR FINGERPRINT IS YOUR PASSWORD

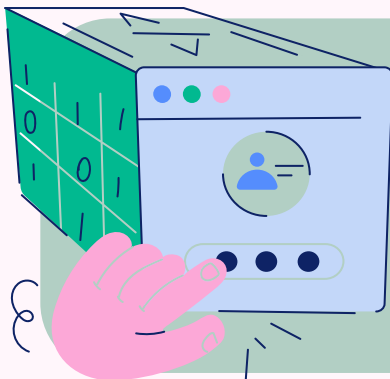

Why It's Better:

- No passwords to remember.
- Unique to you—can't be guessed or stolen.
- Works instantly on supported devices.

01.

Enable biometrics

On your work laptop/phone
(Face ID, Windows Hello, Touch
ID).

Register your biometric

In the company's login portal
(step-by-step link provided by
IT).

02.

03.

Use it daily

—when prompted, just look at
the camera or place your finger
on the sensor.

Quick Tip 💡: If your biometric fails, you'll have a backup option (security key or recovery code).
